## SCHMIDT & BENDER SCOPES

from Germany, Exclusively ours in Canada

### Section View of our Telescopic sight: Details are important

These are the essential optical components: eyepiece, reversal lens system, reticle/focal plane of objective lens, and objective lens.

The ultimate scopes for hunting-target, silhouette or varmint shooting. Rugged steel construction, excellent optics, and precise click adjustments meet the requirements for the serious shooter. A five step process assures a durable, corrosion resistant finish.

A unique reticle control indicator always keeps you aware as to how much adjustment you have left and also makes it simpler to center your scope.

Available in fixed-power or variable power models, and with choice of reticle (see chart at right). Recommended for hunting are reticles number 6 and 8 as they are the best compromise for most hunting conditions. Reticle number one is tapered so as to cover less of the target. Comes complete with clear view lens caps.

## Pistols

Founded in 1949, Heckler & Koch are leaders in high-technology weapons, and are among the finest gun designers and manufacturers in Europe. A large part of HK's splendid reputation is due to the exclusive DRLB (delayed roller-locked bolt) system – the same technology that gives their HK hunting and sporting rifles their unexcelled reliability and precision.

### P7 Series Semi-Auto Pistols, 9 mm Para

A revolution in handgun technology; HKP7 can be drawn, cocked and fired in one continuous motion, simply by squeezing the handgrip and pulling the trigger. No hammer to pull back, no separate safety to fumble with. Nor will it fire if accidentally dropped or bumped, even with a round in the chamber. Smooth acting with no external moving parts, it stays on target from first round to last. Novel 3-dot sighting system works fast even in poor light. Features an ambidextrous magazine release behind the trigger guard, developed for the New Jersey State Police.

### P7K3 Semi-Auto Pistols

Its design and operation are largely identical to the P7M8 and P7M13 pistols. Has an inertia bolt without gas piston. Conversion kits are available which permit the change of calibre by simple barrel and magazine exchange. This .22 LR calibre slide is specially designed for intensive training fire of inexpensive rimfire cartridges. The barrel is provided with a linear floating chamber to increase safe functioning. Complete identical handling from left and right, therefore, suitable for both left and right handed shooters. Ideal for sport, self-defence or practice shooting.
